

Hints from the Model Garage

Chucked in an electric drill, the gritty core of a pencil-type typewriter eraser makes it easy to touch up tiny rust spots on a car body without scratching the adjoining paint. The eraser will quickly remove the rust and clean the metal for painting.

A large baking pan kept in the trunk of your car is a neat container in which to place wet and muddy tire chains if you have to remove them along the road. Your wife may have an old battered pan that she would be willing to discard.

When draining coolant in cold weather, be sure a good stream runs freely from the block or you may have a costly freeze-up. If the water just dribbles out, remove the cock and use the blast from an air hose to loosen the sediment that can block drainage.

To pour antifreeze into the radiator from a large can, stand at the side of the car with the can extending into the engine compartment so that any dribbles get on the engine and not the body. The fluid won't hurt engine parts, but damages paint.
