

# Hints FROM THE MODEL GARAGE

**Carrying long pieces of pipe** in a pickup truck is easy when you do it this way. Install empty pails in the rear corners of the truck bed to serve as quivers for the ends of the pipe lengths. Be careful if you should come to an underpass that's a bit low.

**There ought to be a law** against service-station attendants who slam a hood shut. Engineers say that hoods were designed to close with gentle pressure. If slamming is required, previous slamming may have damaged the latch or warped the hood itself.

**An underseat heater** may lose heat from a long supply line. If you have this type of heater, better check to see whether you can do something about insulating the line. Applying the snap-on type of insulation used in houses will do the trick very effectively.

**Two-tone parts boxes** are not yet a necessity in a service garage. But one operator says that frequent replacement of gritty old boxes with new, clean ones pays off. Soft rubber on the bottoms protects fenders. Parts are cleaned before they're put back.
