

**For a neat trunk** that's easy to keep clean, cut a paper pattern to fit the trunk floor and trace its outline on a piece of linoleum. Installed in the trunk, the linoleum presents a smooth surface that won't scratch luggage.

**A glass of water** placed on the front fender will guide you when adjusting the carburetor. Turn the idling screws in or out until the water is least agitated. At this point, the jets will be set for the smoothest idle possible.

**Wipe front tires clean** after you have your car lubricated. Grease forced out of front-end fittings invariably falls on the inner wall of the tires and, if allowed to remain, it will soften the rubber and eventually weaken the tire.

### Do You Have an Auto Hint? Send It in and Win a Prize

HAVE you discovered or developed a moneysaving short cut for making your own auto repairs? Have you found an easier way to do a difficult job? Got a tip that will make driving safer or easier? Or do you know someone who has an original tip, one not previously published?

POPULAR SCIENCE will pay a cash prize of \$15 for every auto-repair hint accepted for publication each month in Hints from the Model Garage.

Describe your idea as completely as you can in words. Add a pencil drawing, or shoot a photo, if you feel that this will make it more easily understood. Address your entry to Model Garage Editor, POPULAR SCIENCE, 353 Fourth Ave., New York 10, N. Y.
