

EIGHT HANDY IDEAS

1 COINS FOR TOLLS on highways, bridges, ferries, and tunnels are always at your finger tips in this special holder mounted on your dash. A heavy spring paper clip is attached to the dash with a screw through one of the handles. Coins pinched between its jaws are easily removed as needed.—D.K.

2 SLIP-PROOFING A BUMPER JACK is easy if you keep on hand a few pieces of old inner-tube rubber about one by two inches. One of these folded in the notch of the jack will keep the bumper from slipping. I always carry a few of the rubber pieces strung on a wire in my trunk compartment.—M.J.P.

3 BATTERY-TESTER PRONG POINTS often become corroded and dulled through neglect when not in use. To prevent this, attach a clip to the wall to grip the handle of the tester, and beneath it mount a small trough. The latter is filled with a mixture of sand and soda which keeps the tester points bright and sharp.—W.G.W.

4 TWO-IN-ONE GLARE SHIELD. While traveling against the sun on a winding road, you are likely to find yourself continually shifting the glare shield back and forth between the windshield and the door. Hinge an extra shield to the front shield as illustrated. When not in use, it folds against the front shield, which swings up against the top in the usual manner.—E.H.
