

FOR THE MOTORIST

5 A GLOVE-COMPARTMENT LIGHT eliminates the annoyance of groping in the dark for licenses, maps, cigarettes, or other articles. Controlled by a door-jamb switch, the lamp goes on automatically when the compartment is opened.—P.N.

6 COMPRESSING PISTON RINGS can be done easily with a piece of wire and a pair of pliers. Loop one end of the wire firmly around a stud in the cylinder block and wind it once around the ring to be compressed. Pull the free end of the wire until the ends of the ring meet, and tap gently on top of the piston to force it down into the cylinder.—F. McC.

7 RUNNING-BOARD FOOT SCRAPER. The best way to keep the floor of your car clean is to install a foot scraper under the running board or body. A six-inch strap hinge is mounted on a steel plate, which in turn is fastened to the running-board bracket. A protruding end of the mounting plate serves as a lug to stop the hinge in the open position. When not in use, the hinge folds back out of sight.—E.F.

8 RUBBISH FENCE FOR GARAGE. Leaves and rubbish are kept from blowing into an open garage door by a fence of inner-tube rubber five or six inches wide stretched across the opening at the floor level. The rubber gives enough to allow the car to pass over it.—A.H.W.
