**Color Bands Help Select Proper Grease Gun**

SERVICE-STATION proprietors, or car owners who do their own greasing jobs, can save time and avoid the mistake of selecting the wrong grease gun by means of a simple expedient. Just paint a red band around the barrel of the gun holding, say, the regular high-pressure grease, a blue band around the gun holding the universal-joint grease, and a green band around the spring-shackle gun. A chart with colored rectangles, giving the key to the system, may then be tacked on the wall or the grease-gun rack.—W. C. W.

**Sliding Door of Garage Latches Automatically**

MY GARAGE has a sliding door which hooks on the inside. I found it a nuisance always to have to lock the hook and screw eye from the inside and then leave by the side door. The simple arrangement shown above solved my problem. A sheet-metal track screwed to the door guides the hook as the door shuts, dropping it into the screw eye. A large-head nail holds the hook so that it enters the track properly.—F. H.
