

SMOKY JOE HAD THE DAMSEL IN DISTRESS!

"GIDDYAP, NAPOLEON! Looks like this Romeo is trying his darndest to smoke us out. Phew! His tobacco smells like the backfire from Pa's flivver!" Just then

UP RIDES A RANGER, sniffs the pipe, says to clean it and refill with *mild* Sir Walter, a burley blend famous for aroma. It worked! Joe won her back!

New!

CELLOPHANE TAPE

around lid seals flavor in . . . brings you tobacco 100% factory-fresh!

IT SMOKES AS SWEET AS IT SMELLS

TUNE IN—Sir Walter Raleigh "Dog House." Every Tuesday night, coast-to-coast, NBC Red Network.

Rubber Strap Simplifies Removing Headlamp Rim

LOOSENING and removal of lens rims from headlights on cars several years old is simplified considerably if a tongue strap cut from an old inner tube is employed in the manner shown in the sketch above. The strap is stretched around the lens rim and the tongue slipped through the slit to hold it firm while the lens is being removed from the lamp.—G. E. H.

Compass Test Reveals Cracked Battery Wall

WHEN you are having starter or battery trouble in your car, it's a good thing to remember that a sudden jar, such as a battery would receive if accidentally dopped when being installed, will frequently crack the separator between two cells. The outside of the battery case will not reveal this but you can determine the fact easily with the aid of a compass. Place it on the lead strap connecting first one set of cells and then the other. If a separator is cracked, the compass needle will be deflected at right angles to the connecting strap between the cells. If you do not get this reaction, you must look for the trouble elsewhere.—E. J. N.

COMPASS NEEDLE AT RIGHT ANGLES TO CONNECTOR STRIP INDICATES A BROKEN PARTITION BENEATH IT
