

SEVEN HANDY TIPS

1 EASILY HANDLED STRIP MAPS for your cross-country motor trips can be made from ordinary road maps. Cut out the section of the map your route covers and paste it on a card, leaving a space at the bottom. In this space, print the highway numbers and distances between highway junctions, as shown at left.—D.B.J.

2 A DRIVER'S ARM REST can be made from a piece of sheet iron, some inner tube rubber, and the stuffing from an old seat cushion. Cut and bend the metal to fit the window ledge and your arm. Then cover it with rubber, which should be cemented in place. Before sealing up the end, pack the cushion stuffing inside as padding.—N.L.K.

3 SHIELDED DECK-LID CORNERS will help to protect your head should you accidentally bump the corners when the lid is raised. Electrician's rubber tape of the type that is adhesive on one side may be attached inconspicuously to the edges as a safety precaution. It should not interfere with tight closing of the lid.—W.E.B.

4 MOUNT AN UMBRELLA behind the front seat of your car where it is out of the way, yet handy if you are caught in the rain. Sheet steel is usually the material of the seat back, so it will be necessary to drill holes at the proper points and attach the holding straps, as shown, by means of self-threading screws.—H.P.
