

More Hints from the Model Garage

An inexpensive axle and frame stand can be had from your TV repairman; just ask him for a burned-out picture tube. Have the glass removed (let him do this). The top of the metal cone will crush slightly in use; this keeps the car from slipping off.

A wire holder for your thermos bottle will keep it from tipping when you turn or stop quickly. Cut the flatiron-shaped base from hardboard. Tack and glue wood strips to it and drill them to accept coat-hanger wire. The base slips under the front seat back.

Use your pull-out ash tray as a storage box if you're a nonsmoker. Remove the back wall and extend the length of the tray with sheet metal. You will then have a handy storage compartment for a pencil, pen, comb, tire gauge, and other small items.

Install a litter basket in your Corvair under the radio. A cross-braced bracket hangs on screws in back of the radio. A $1/4$ " dowel glued to the bottom of the basket fits curved bracket ends. Two magnets on the bracket hold a metal strip at top.
